

Model CH-45

Model CH-45* - Cold/Heat Seal System for a unique packaging solution

System Packaging has combined its versatile, high-quality double web pouch machine (the Model 4500) using strip coated bubble or polyethylene with a heat seal cut-off, to produce packages that don't mold to the product shape, can have easy-open feature, and are easily returned - providing the extra value-added service your customer's will appreciate.

The CH-45 easily produces 15 to 20 packages per minute using just one operator, and can make various mailer lengths on the fly. This system also allows you to stock rolls versus boxes, for additional cost savings and increased warehouse space.

The perfect system for packaging:

- ▶ Jewelry
- ▶ Cosmetics
- ▶ Nutraceuticals / Pharmaceuticals
- ▶ Books / DVD's / CD's
- ▶ Small Parts

*Patent Pending
