

# MODEL M-1300

**Reliable, easy to operate and will save you 60-70% in labor and material costs compared to other seamless poly-baggers**

Note - casters are optional

The model M-1300's unique design makes use of inexpensive polyethylene tubing to eliminate premade bags, hand sealing and single-source supply headaches. All machine functions of the model

M-1300 bagger are controlled by a microprocessor based system unique to the packaging industry. All components are modular, keeping service problems to a minimum.
